Your responsibilities:

- Further development and implementation of an end-to-end controlling process in the areas of production and warehouse management
- Preparation, analysis and interpretation of data to derive meaningful key performance indicators
- Preparation of ad hoc analyses and reports for senior management and production management (e.g. target/actual analyses, productivity tracking)
- Ongoing variance analysis relating to production costs and post-production costing
- Design, management and further development of controlling tools (dashboards, BI)
- Assistance with monthly, quarterly and annual financial statements, particularly with regard to the valuation of inventories and work in progress
- Close coordination with specialist departments to evaluate and implement innovation proposals

Your profile:

- A degree in business administration or equivalent qualification
- Several years' professional experience in a manufacturing environment, ideally in customer-order-based production
- Substantial experience in production controlling, particularly in the analysis, evaluation and further development of production processes
- A structured and precise approach to work, combined with a proactive, communicative personality
- A creative thinker with a strong aptitude for numbers and analytical skills
- Proficiency in MS Office and common ERP systems; knowledge of Power BI would be an advantage

What you can expect:

- A variety of projects within a motivated team
- Modern equipment and well-equipped production halls
- Numerous additional benefits: Fruit, company doctor, gym subsidy, ...
- Opportunities for professional development within a successful industrial company with a family-like corporate culture
- Canteen serving regional specialities
- Option to work from home (1 day a week)
- The opportunity to play an active role in shaping the company's future
