Your responsibilities:

- Leading, managing and organising teams in the field of plant cabling and electrical installation
- Proactive capacity and material requirements planning to ensure delivery deadlines are met, in collaboration with the relevant specialist departments
- Monitoring and ensuring the quality of all electrical work in the container facilities (low and medium voltage)
- Coordination, liaison and acting as the point of contact for our clients' supervisors
- Ensuring compliance with the relevant laws, regulations, standards and codes
- Checking and supervising inspections, testing and record-keeping

Your profile:

- Technical qualification in electrical engineering (e.g. HTL) or a qualification examination/master craftsman's examination (or equivalent) in electrical engineering
- Several years' relevant professional experience (experience in plant engineering would be an advantage)
- Strong communication skills, a high degree of reliability, commitment and a willingness to perform
- Good technical understanding
- Very good knowledge of Czech
- Good knowledge of German or English (for communication with head office in Austria)

What you can expect:

- An interesting working environment within a motivated team
- A strong, international company with a secure order book
- 5 weeks' annual leave
- Company events, rest areas, a canteen
- State-of-the-art work equipment
- High-quality protective equipment and workwear
- Opportunities for professional development in an industrial company with all the benefits of a family-run business
