Your responsibilities:

- Providing technical support in the design and calculation of air-conditioning systems for the temperature control of thermally stressed installations
- Co-ordinating with the electrical engineering department during project planning, including the review of order-related electrical documentation
- Supporting activities in sales order processing and document management
- Coordination and consultation on various tasks with internal specialist departments, as well as with customers and suppliers

Your profile:

- Completed technical training in the field of air-conditioning/refrigeration technology, mechatronics, electrical engineering or building services engineering (e.g. apprenticeship as an HVAC technician with relevant practical experience, HTL, university of applied sciences...)
- Relevant professional experience in a comparable role (ideally at least three years)
- Ability to work independently whilst being a team player
- Proficiency in MS Office
- Very good written and spoken German and good written and spoken English

What you can expect:

- Varied projects within a motivated team
- Modern equipment and well-equipped production halls
- Numerous additional benefits: Fruit, company doctor, gym subsidy, ...
- Opportunities for development within a successful industrial company with a family-like corporate culture
- Canteen serving regional specialties
- The chance to play an active role in shaping the company's future
