**VIEW JOB ONLINE**

Would you like to start working in the field straight after completing your HTL and apply your electrical engineering knowledge to exciting projects? Then you've come to the right place.

#### **Your tasks:**

- Assisting with the planning and design of electrical systems in plant engineering
- Creating and maintaining electrical diagrams as well as 2D and 3D documentation
- Supporting the engineering of electrical systems and installations
- Creating parts lists, production and project documentation
- Technical coordination with internal specialist departments and customers
- Contributing to the implementation of customer requirements and project solutions

#### **Your profile:**

- Completed technical training in electrical engineering (preferably HTL, alternatively technical college)
- Initial practical experience gained through school projects, work placements or holiday jobs is an advantage
- Interest in the planning and design of electrical systems
- Knowledge of EPLAN or other CAD systems is an advantage
- A structured, independent and solution-oriented approach to work
- Ability to work in a team, as well as a willingness to learn and a commitment to the role
- Very good written and spoken German and English

#### **What you can expect:**

- Varied projects within a motivated team
- Modern equipment and well-equipped production halls
- Numerous additional benefits: Fruit, company doctor, gym subsidy, ...
- Opportunities for development in a successful industrial company with a family-like corporate culture
- Canteen serving regional specialities

Does this job appeal to you? Then apply now – we look forward to getting to know you!

A gross salary of €3,400 is offered for this full-time position. We are happy to offer a higher salary depending on your professional experience and qualifications.
