Would you like to do more than just manage systems – would you like to actively improve processes and help shape the digital transformation of a modern industrial company? Then join our team! As an IT Project Manager for our DMS systems, you'll act as the key link between production, business departments and IT, and play a key role in the further development of our IT system landscape.

Your responsibilities:

- Managing our DMS and PDM systems
- Supporting specialist departments in using and optimising the systems
- Maintaining and managing document, product and master data, as well as user and access rights management
- Providing support for system updates, testing and customisation
- Managing interfaces between ERP, DMS and PDM systems
- Preparing reports, documentation and materials for user training

Your profile:

- Completed IT training (HTL, degree) or equivalent qualification
- Initial experience in managing IT projects
- Good knowledge of working with DMS systems
- Proactive approach and a good understanding of production processes and data structures
- Analytical, structured and solution-oriented working style
- Strong communication skills and a passion for working with different departments
- Very good written and spoken German and good written and spoken English

What you can expect:

- Varied projects within a motivated team
- Modern equipment and well-equipped production halls
- Numerous additional benefits: Fruit, company doctor, gym subsidy, ...
- Opportunities for development within a successful industrial company with a family-like corporate culture
- Canteen serving regional specialties

Does this job appeal to you? Then apply now – we look forward to getting to know you!

For this full-time position, a gross salary starting at 3,500 euros is offered. We are happy to offer a higher salary depending on your professional experience and qualifications.
